metrotile[®]
worldwide roofing systems

A Family Company

As a customer of Metrotile®, you can expect to benefit from strong local support combined with the resources of a global company. By developing high-quality products, supported by great service, we aim to make a valuable contribution to homes and building projects throughout Africa and to the wellbeing and contentment of homeowner.

These are the values, principles and behaviour that we follow in order to provide high quality products and services worldwide.

HIGH QUALITY RAW MATERIALS

including AZ150 alu-zinc® steel and high quality coating is used to manufacture Metrotile® products. These extend product lifecycle, preventing rust and colour change, even in the harsh coastal environments

MANUFACTURED IN EUROPE

since 1997 in our state of the art factory

DISTRIBUTED IN AFRICA

by our over 20 years established partners holding stocks locally and supporting clients with professional advice

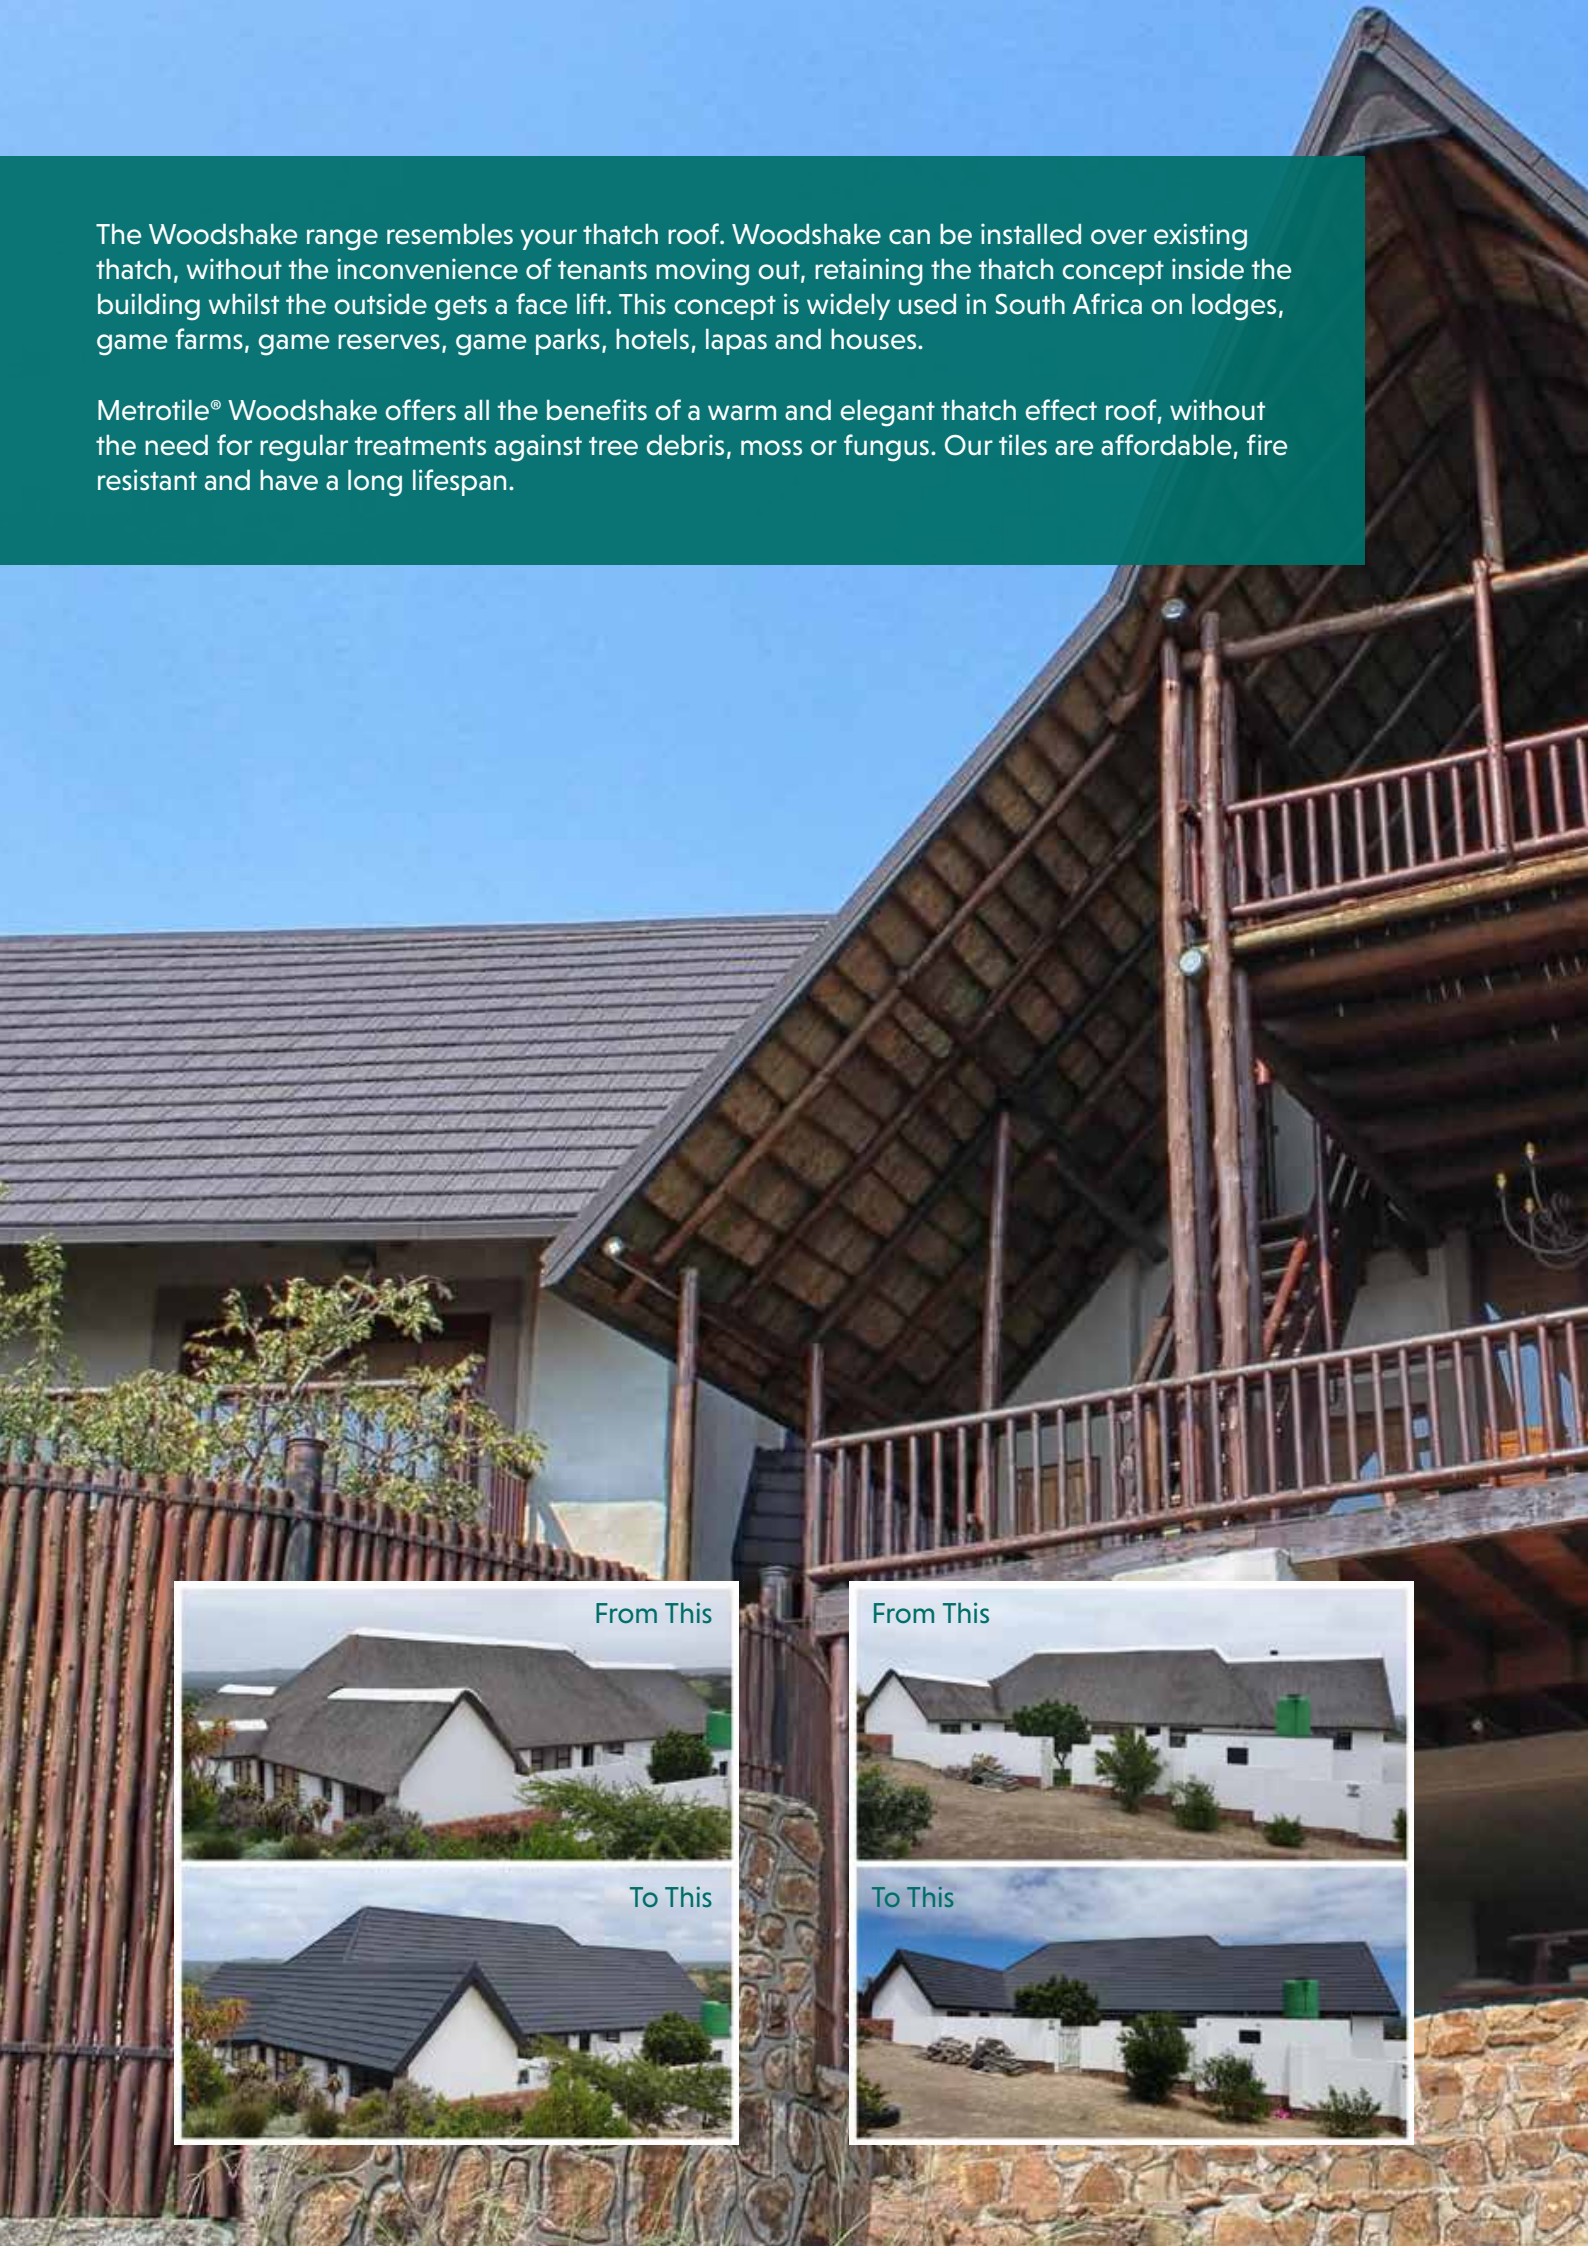

Metrotile® Thatch

Do you have continuous maintenance problems with your thatched roof as a result of varying weather conditions, birds, monkeys, rodents and insects ruining your thatch? What about fire risks and high insurance premiums?

Metrotile® has a permanent and lasting solution to your problems with a 30 year warranty that will reduce your insurance and maintenance costs significantly.

The Woodshake range resembles your thatch roof. Woodshake can be installed over existing thatch, without the inconvenience of tenants moving out, retaining the thatch concept inside the building whilst the outside gets a face lift. This concept is widely used in South Africa on lodges, game farms, game reserves, game parks, hotels, lapas and houses.

Metrotile® Woodshake offers all the benefits of a warm and elegant thatch effect roof, without the need for regular treatments against tree debris, moss or fungus. Our tiles are affordable, fire resistant and have a long lifespan.

Features & Benefits

Performance

UV PROTECTION

The colour of the natural stone chip on our tiles is protected against UV & colour change

WIND RESISTANCE

A Metrotile® Roof can withstand the strongest of winds, leaving no damage

LOW RAIN NOISE

The stone coating on our tiles reduces the noise of rain

LIGHTWEIGHT

Easy to transport and handle, our tiles install quickly & easily, and can save on the cost of the sub-structure

STRONG

Although lightweight, our steel tiles are incredibly strong and robust

SECURE

It's impossible to break in to a Metrotile® Roof, making them the most secure type of roof available

Warranty

Metrotile® roofs have a free 30 year warranty & a 15 year coastal warranty, providing you with peace of mind.

Why risk un-proven tiles when you can enjoy all the benefits of Metrotile®?

Specification

Size of tile - Overall:	1340mm x 415mm
Size of tile - Cover:	1265mm x 370mm

Avoid the threat of fire to life & property

Metrotile® Woodshake

V'S

Thatch Roofing

- Lower Insurance premiums
- Lightweight making Metrotile cheaper and more environmentally friendly to transport
- Metrotiles wont break or crack during transport
- Less waste, Less cost
- Our tiles require less support, saving cost on your structural timber and frame
- Quick and easy to install
- The tough Alu-Zinc steel wont crack or rust
- Tiles will not move during wind or storms
- Incredible security - can not be removed by intruders
- Virtually maintenance free
- Free 15 year Coastal Warranty
- Fireproof (ASTM Grade A fire rating)
- Inpenetrable by animals and insects

- The need to be located away from over-hanging trees
- Greater risk of lightning strikes damaging the home & the need to install lightning rods - More time and cost!
- More support and time when constructing
- Potential for leaks
- Risk of movement in winds or storms
- A lot more intense maintenance
- Animals can cause damage - Birds nests, etc.
- Risk of insect infestation
- Prone to fungal attacks
- Decays and decomposes over time
- Needs replacing every 8-10 years
- The process of thatching is more labour intensive, which effects the overall cost
- Higher insurance costs
- More vulnerable to fire risk
